

UserControl

IAMLEditorView

Aml.Editor.Plugin.ModellingWizard

```
classDiagram
    class UserControl
    class IAMLEditorView
    class AmlEditorPluginModellingWizard["Aml.Editor.Plugin.ModellingWizard"]
    AmlEditorPluginModellingWizard --|> UserControl
    AmlEditorPluginModellingWizard --|> IAMLEditorView
```

The diagram illustrates a class hierarchy where the `Aml.Editor.Plugin.ModellingWizard` class inherits from both the `UserControl` and `IAMLEditorView` classes. This is represented by two arrows pointing from the `Aml.Editor.Plugin.ModellingWizard` box to the `UserControl` and `IAMLEditorView` boxes, indicating a generalization relationship.
